the ver

take 2-5 hours to complete each course (which can be broken into any increments you choose –you do not have to complete the course(s) in one sitting), you are issued a completion certificate automatically and entered into the completion database.

HSI is committed to delivering training in a number of ways. Initial efforts are being made to impact trainees across the emergency response disciplines. Standardized training has been introduced in state training nodes such as the Fire Training Academy, the Criminal Justice Training Center, and the State Patrol Academy. Community and technical colleges in homeland security-related fields will begin taking the online courses as part of their curriculum next year.

These state-recommended courses will help you work closely with professionals from all eleven emergency responder disciplines. We have emphasized online training as the only viable way of reaching many of the 200,000+ responders in Washington State. We also consider it an important potential tool for delivering awareness courses directly to the public, should the need arise. The courses can

Introduction to Incident Command System IS 100 (.3 CEU's)

ICS 100 is a training course designed to help you learn about the organization structure and basic principles of the Incident Command System.

This course is intended for entry level personnel. The information provided will enable you to assist at an incident or to help support an incident from an off-site location.

An incident is an occurrence, either human caused or by natural phenomena, that requires action by emergency service personnel to prevent or minimize loss of life or damage to property and/or natural resources.

This course meets NIMS requirements for IS 100 equivalent

**Basic Incident Command System,
IS-200 .3 CEU's**

Basic Incident Command System, IS-200

Predesignated Incident Locations and Facilities

Incident activities may be accomplished from a variety of operational locations and support facilities. Facilities will be identified and established by the Incident Commander depending on the requirements and complexity of the incident or event.

It is important to know and understand the names and functions of the principal ICS facilities.

Incident Facilities Virtual Tour

The **Incident Command Post**, or ICP, is the location from which the Incident Commander oversees all incident operations. There is generally only one ICP for each incident or event, but it may change locations during the event. Every incident or event must have some form of an Incident Command Post. The ICP may be located in a vehicle, trailer, tent, or within a building. The ICP will be positioned outside of the present and potential hazard zone but close enough to the incident to maintain command. The ICP will be designated by the name of the incident, e.g., Trail Creek ICP.

Mass Decontamination Test Out

There are 20 multiple choice and true/false questions. If you score 80% or above you will receive a certificate of completion. The Test Out can be taken once.

Each course has the ability to allow for “testing out” once with a minimum score of 80%. This is optional but receiving an 80% > will issue the user a certificate of completion.

Reviewing the course and taking the post assessment will allow the user 6 attempts to pass the Assessment with a score of 75% or higher.
